Firstgold Corp. releases first issue of monthly newsletter

As you can see, we have the format for our new monthly newsletter. As shareholders, investors, and potential investors, your feedback is always important to us.

Many of you have expressed interest in a more in depth understanding of the day to day business of our operation. In a computer age of educated investors and armchair CEO’s, we understand that the demand of knowledge is at an all time high. It is our hope that this medium will provide you with the more intimate view of the inner cogs of Firstgold Corp. that you have asked for.

As always, please feel free to email questions and feed back to info@firstgoldcorp.com, so that we can continue to provide you with helpful and valuable information on a regular basis.

Firstgold Corp.’s new Mine Manager for Relief Canyon, Stephen Tibbals

CEO’s Corner

Hello! It goes without saying that I am excited about all that is going on in the company right now. With our plan of operations coming into effect and our TSX listing pending, I am anxious to move on to the next phase at Relief Canyon. We have our drill rig on site and are interviewing candidates for our in house drill crew. Geology is crunching data from our ground magnetic survey, and our Mine Manager is working with the engineers on the design to expand our plant.

I am also excited about this newsletter. Let us know if there is any additional content we can provide for you!

Cheers,

Scott Dockter
President/CEO
Firstgold Corp.

Mine Manager Hired for Relief Canyon:

Firstgold Corp. recently acquired Stephen Tibbals to it’s talent pool. He began work in early January as the Relief Canyon Mine Manager and is currently heading all efforts in that arena.

With over 25 years of direct industry experience, in addition to a degree in Mining Engineering from Mackay School of Mines, at the University of Nevada-Reno, Mr. Tibbals is excellently equipped to handle any and all situations that will arise in the construction and activation of the Relief Canyon mine. Based on the needs at hand, Stephen’s current priority is to accelerate Relief Canyon’s path to production. He is currently working with an engineering firm to design the expanded model for Relief Canyon’s milling facility. Of this...

Firstgold Opens New Office Lovelock, NV location is operational

Due to the increasing demands for manpower and management at the Relief Canyon mine, Firstgold Corp. has opened a Nevada office in Lovelock. Based out of this office will be Firstgold Corp's mine manager, Steve Tibbals, as well as all of the exploration staff and Relief Canyon labor teams.

Operations Manager Phil Bosley commented, "With our mine in Lovelock and exploration plays scattered across northern Nevada, it just makes sense to base all of our projects out of one central location." This hub will be used as a center for digital modeling of mining and exploration plays, as well as become the central library of all available geologic data for its exploration ventures. This office will serve as a compliment to Firstgold Corp's corporate office, which is currently under construction in Cameron Park, CA.

Firstgold Corp's Nevada office is located at 1055 Cornell Avenue; Lovelock, NV, and visitors are welcome by appointment.

Manager (Continued)

Mr. Tibbals stated, "We are currently equipped for a relatively low level of production. We want to be ready for rapid growth and expansion as this project accelerates."

Additionally Mr. Tibbals is interviewing drillers to operate the proposed drill program at Relief Canyon. While the first year of material is well defined, expansion and planning will be high on Steve's to do list.

Company CEO Scott Dockter stated, "Having Steve on board is the natural next step in taking this company forward. You can't have a mine, without a Mine Manager, and Steve is the man for the job."
